The accounts which have been sent to the State have been all allowed except that of Mary King and Peter Lezott; these two accounts were both started last year before Feb 20, 1904, but not entered on our books. The affidavits in regard to them were procured by the Selectmen last year, when they were sent in; the claims were not allowed. But by means of correspondence and Mr Irving's efforts before the committee we hope to have the matter reopened and allowed. It must be remembered that last year's State pauper account, as reported, (six dollars due from the state) included only ten months of supplies, the remaining two months' supplies and medical attendance had been furnished by profesional and business men and the bills had to be paid at once after town meeting so the above account really includes nearly fourteen (14) months.

Auditor's Report

This certifies that I have examined the accounts of the selectmen and treasurer of the town of Caribou for the year ending Feb 20, 1905, and find them correctly kept and with proper vouchers for the several charges.

R. C. GARY, Auditor.

Caribou, March 11, 1905.

Report of Superintendent of Schools

To the School Committee and Citizens of Caribou.

In making the annual report of the work done in our schools for the past twelve months, perhaps it will be better understood if a brief summary is given as outlined in expenditures for schools found on another page of this report.

In the hiring of teachers, we have endeavored to be as economical as possible, but with this thought in view, that it is better to pay a teacher seven or eight dollars per week and obtain the necessary results than to expend five dollars for a person who is unable to succeed in the work required.

We have had thirty-four teachers at work in our common schools, eleven in the village, with four hundred and ninety-seven scholars, and twenty-three in the rural districts with five hundred and fifteen pupils. Many of our schools are too small. In an ungraded school the best work can be done with not less than twenty nor more than thirty-five scholars. We have five districts that had an attendance during the fall term of 1904 of sixty-six pupils. These cost the town during the year \$1,212.50. In the village we have been aided by the two extra rooms in the new primary school building, but our ten grades require two additional rooms which will be necessary in the near future.

I will say that the teachers in the village and country have done excellent work as ascertained from my own observation and from the reports of the members of the school committee. In order to retain the same teachers and the requisite number it will be necessary to raise the common school money from \$3800 to \$4500.

We closed the school in district No. 9 and conveyed the scholars to the graded schools of the village at an expense during the winter term of \$7.50 per week, having two teams one

from the Oxbow road and one starting at Thomas' above the town farm. This has made an expense to the town of \$67 and a school would have cost \$189 counting the fall and winter terms. By this method we have had better attendance and better school privileges at less expense. In four grades these additional scholars have been desirable and in two undesirable on account insufficient room.

We have found fourteen scholars in the Varnum district and have conveyed them to the village. We have conveyed part of the winter term the scholars on the Washburn road and are conveying three scholars to No. 7 from the settlement adjoining Woodland, also ten pupils to No. 20 from the Fort Fairfield line. The total expenditures for the year have been \$117.

JANITORS AND WOOD.

In the hiring of janitors we have used the method as of former years. Our wood and coal bill has increased on account of the increase in price and extra number of rooms.

TEXT BOOKS.

We have instituted a series of readers for the schools which when fully supplied will be an advantage to teachers and scholars. In the rural schools the New Education has been selected as the basal reader and the Stepping Stone series as the supplementary. In the village schools we have the Ward and Heath readers for the basal and the Stepping Stone for the supplementary. The Milne Arithmetic is still in use in the ungraded schools, but in the village we adopted the Nichol's Graded Arithmetic with excellent results. In order to have the schools well supplied with books we should raise at least \$800.

NEW PRIMARY SCHOOL.

We have expended the \$2500 raised by the town on the new Primary school building and were obliged to overdraw this account somewhat in order to finish the whole job properly as good reason and judgment dictated, but much of the overdraft was due to unlooked for necessary repairs on different parts of the building. The carpenter work on this job was faithfully and well done by O. L. Atherton assisted by F. C. Ellingwood.

As a result two modern rooms have been finished and furnished. A heating arrangement for the whole building was put in by W. C. Spaulding. The basement is arranged with a furnace room, two separate play rooms and sanitary closets for the boys and girls.

REPAIRS.

The repairs on the school houses have been done as circumstances required. We have put a new floor in the Madawaska bridge school house, sheathed and laid a new floor in the Wright school house.

HIGH SCHOOL.

The High school started the year with a freshman class of forty-eight, the largest entering class in the history of the school. We have had an attendance in the four classes of one hundred and twenty-two. One hundred and twenty-five dollars are due from the State which at present has not been received.

INSURANCE, APPURTENANCES, AND APPLIANCES.

This account can be thoroughly understood in the financial report and requires no further explanation.

In conclusion, we wish to express our appreciation of the interest shown in educational work by the citizens in the northern end of the town as well as in the southern part.

W. P. HAMILTON, Supt. of Schools.
